

United Nations Sustainable Development Goal

Gender-based violence (GBV) is a profound and widespread problem in South Africa, impacting on almost every aspect of life. GBV (which disproportionately affects women and girls) is systemic, and deeply entrenched in institutions, cultures and traditions in South Africa.

Problem Statement

ggggggg

Safety is a huge issue for women in South Africa, and it's not always easy to know which areas are safe and which are not.

- ★ We're building a centralized dashboard to track gender based Violence within the south african regions.
- ★ This will help women to know if an area is safe or not, and whether they should be on guard when they go to a new area.

Used Tech

- ❑ GITHUB for collaboration
- ❑ Python for coding
- ❑ social media for research
- ❑ Trello for managing the Project

WHAT MAKES OUR SOLUTION TO BE UNIQUE

Our solution mainly focuses on the South African cities , where one can be able to navigate and check how safe a city is.
